## Motor Vehicle Accident Rehabilitation

Dynamic Physiotherapy is experienced in handling motor vehicle accident injuries including sprains, strains, fractures and whiplash.

Following our assessment and diagnosis, we will assist you with completing the required paperwork for insurance coverage and claim submission.

We will devise a treatment plan to help you recover from your injuries and return to pain-free living as quickly as possible.

You are not required to see a physician prior to commencing physiotherapy, and you are entitled to select the physiotherapy clinic of your choosing.

Accessing motor vehicle accident treatment funding is time sensitive; so we advise that you contact our clinic as early as you are able.
